

Spectral Compliance Assessment – 2% Blue-Light Standard

Fixture ID: SL_083_02°_3001K

Location: 48 Nonohe Pl, Paia, HI 96779

Date / Time: December 4, 2025, 19:35 HST

Measurement Mode: Ambient, direct view of emitting aperture

1. Measurement Overview

A field spectral measurement was conducted in situ of a down-facing exterior light fixture. The spectrometer was positioned directly below the emitting aperture and aligned on-axis with the primary luminous output. The photographic record documents the measurement geometry, GPS location, and operating conditions, establishing provenance and traceability. The geometry is appropriate for characterizing emitted spectral content independent of surface reflections.

2. Correlated Color Temperature (CCT)

The measured Correlated Color Temperature (CCT) of the fixture is 3001 K, placing it in the nominal 'warm white' category. However, CCT alone is not a reliable indicator of blue-light compliance, as phosphor-converted LEDs can maintain low CCT values while emitting significant short-wavelength energy.

3. Spectral Power Distribution and Blue Fraction

Analysis of the measured Spectral Power Distribution (SPD) shows a pronounced short-wavelength component characteristic of phosphor-converted white LEDs, including a distinct blue pump contribution in the ~440–460 nm region. Integration of the SPD indicates that 14.75% of the total emitted radiant power lies below 500 nm.

4. Compliance Evaluation Against 2% Blue Standard

The applicable lighting ordinance limits blue-light emissions to no more than 2% of total spectral output. The measured blue fraction of 14.75% exceeds the allowable limit by a factor of approximately 7.4×. This exceedance is substantial and cannot be attributed to measurement uncertainty.

5. Conclusion

Based on direct field measurement and quantitative spectral analysis, the evaluated fixture does not meet the 2% blue-light emission standard applicable to the measurement location. Despite its nominally warm CCT, the fixture emits a high fraction of short-wavelength light and is therefore non-compliant under the ordinance.
